4

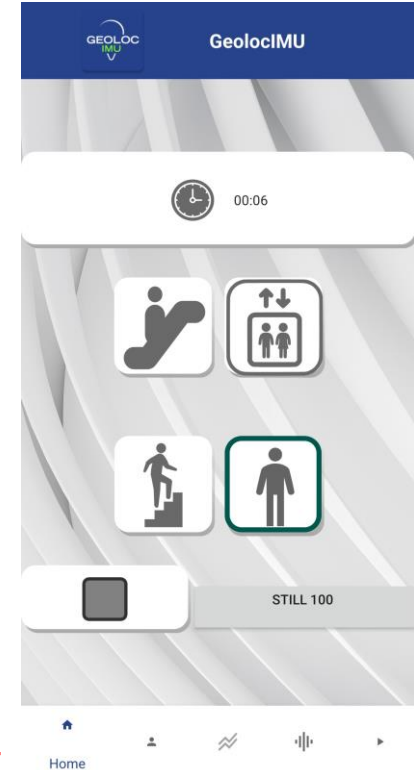

Put your phone

- in your pocket
- In your bag
- in your hand with your arm bent
- in your hand with your arm at your side

Hold this position and take your travel mode

5

To stop recording, press the grey square button

DATA COLLECTION PROTOCOL CHANGE OF FLOOR ESCALATOR

Stand in front of the escalator and press the red button to start recording.

Then place your phone in your pocket or in your hand with your arm at your side.

Then use the escalator, standing still until you reach the end.

When the escalator is finished, take out your phone to stop the recording by pressing the grey button.

DATA COLLECTION PROTOCOL CHANGE OF FLOOR STAIRS

In front of the stairs at the top or bottom, position yourself and press the red button to start recording.

Then place your phone in your pocket or in your hand, holding your arm at your side.

When you have finished, stop recording by pressing the grey button.

DATA COLLECTION PROTOCOL CHANGE OF FLOOR ELEVATOR

Position yourself in the lift with the lift doors closed.

Choose your floor and press the red button to start recording.

Then place your phone in your pocket or in your hand, holding your arm at your side or at an angle.

Use the lift by standing still until it is completed.

After the lift doors have opened on your arrival, take out your phone and stop the recording.

DATA COLLECTION PROTOCOL CHANGE OF FLOOR UNDEFINED

You can select this icon when you're standing still, for example waiting for the elevator.

You must be standing still for a long time (more than 3 seconds).
